

PARALLAX SCROLLING WEBSITE
A MAJOR PROJECT REPORT

**SUBMITTED IN PARTIAL FULFILMENT OF THE
REQUIREMENT FOR THE AWARD
OF THE DEGREE OF
BACHELOR OF COMPUTER APPLICATION
(BACHELOR OF COMPUTER APPLICATION DEPARTMENT)**

MAY 2024

SUBMITTED TO

GOVT POST GRADUATE COLLEGE UNA HP

SUBMITTED BY

TOSHLI SINGH **21BCA006**

AMANPREET KAUR **21BCA046**

RADHIKA KUMARI **21BCA095**

UNDER THE GUIDANCE OF

MRS. RITU PURI

PROFESSOR

BCA DEPARTMENT

HIMACHAL PRADESH UNIVERSITY SHIMLA

ACKNOWLEDGEMENT

We, the members of **Parallax Website Project** would like to express our profound gratitude and appreciation to all those who have contributed for successful completion of this project.

First and foremost, we would like to express our special thanks to our mentor **Mrs. Ritu Puri** for her invaluable guidance, patience and expertise throughout the course of the project.

We are also grateful to our wonderful principal **Dr. Meeta Sharma**, who has created a nurturing and creative environment in our college.

We would also like to acknowledge the support of our families and friends, who provided encouragement, understanding and motivation throughout the duration of this project.

Lastly, we extend our gratitude to each other, the members of **Parallax Website Project**.

The project is done using HTML, CSS, JS on Sublime text platform.

CERTIFICATE

This is to certify that the project entitled
Parallax Scrolling Website
submitted by
Radhika, Toshali and Aman
is an authentication work carried out
for partial fulfillment of the requirements
for the award of the degree of
Bachelor of Computer Applications
under the guidance of
Prof Mrs. Ritu Puri.

The project is original
to the best of our knowledge and belief.
This certificate is clarified by the principal,
Dr. Meeta Sharma
Govt. P.G. College, Una.

Guide

Prof. Mrs. Ritu Puri

Principal

Dr. Meeta Sharma

Date:

Place: Govt P.G. College, Una

CERTIFICATE FROM THE MEMBERS

We, the members of this project, Amanpreet Kaur, Radhika Kumari and Toshali Singh, students of BCA(6thsem) with University Roll no. 6211100007,6211100081,6210500017 do hereby certify that the project Work titled “Parallax Scrolling Website” is bonafide work done by us.

Branch: BCA

University Roll No.

6211100007

Aman:

6211100081

Toshali:

6210500017

Radhika:

Signature of members

Date:

Place: Govt P.G. College, Una

PREFACE

This project report has been prepared for partial fulfillment of the requirement for the award of the degree of "**Bachelor of Computer Applications**".

This project report is prepared for the project completed during the course of BCA, 6th semester undertaken at Government Post Graduate College, Una, Himachal Pradesh under Himachal Pradesh University, Shimla.

The purpose of this project report file is to assemble under one cover a sufficient body of knowledge about management and development of a successful project.

In this project, HTML, CSS AND JS are used to create a user interactive as well as attractive website.

VII.	REFERENCE	53

INTRODUCTION

The project is completed by collab efforts of all the three members of the project under the guidance of Prof. Mrs. Ritu Puri

We have tried our best to create a good website designing or website template. This project is all related to website designing using html, css and js.

Parallax scrolling feature is used in this project to make website look more attractive. Pictures and texts move as we scroll the website. This gives more attractive look to the website.

Even the different elements of an image moves as we scroll down the web page. There is Header and Footer in the webpage.

In the header of web page, there is a navigation bar which is created using html and designing is done using css.

In the top-left corner of the webpage, there is a logo of the website.

As we scroll the webpage, different elements of the image will move and one text moves vertically and the other text will move horizontally.

There are three cards placed horizontally. These cards are actually flip cards. When we point the cursor over any of them, the card will flip and the text behind that card will be shown. There are some hover effects on flip cards.

And the last but not least, there is a footer that have links to various parts of the website.

In the navigation bar and at footer, there is link to another file i.e. intro or Introduction. In this web page, there are 3 buttons to represent HTML CSS and JS. Clicking on any of the button will open a new page which will provide intro of that particular option which was selected. There are 4 buttons around the text which shows links to the home and intro page and other 2 buttons represent other options that introduction page had as buttons.

In the navigation bar and at footer, there is also a link to login or registration which got pop up feature. One can login or register themselves. The login page is made attractive as well with various css features. There is also another button to give link back to the homepage of the website

IMAGE AND FILE MANAGING

The first important thing in this project is to get the required images and store them all in one folder efficiently.

The images used for parallax scrolling is actually one image. Image, we have used in this project is taken from freepik.com which provides images in .eps file format.

And the next step is to separate all the elements of that image and store them separately in .jpg format.

For this, there are numerous websites that provide this faculty over the internet. But, the mostly used is adobe photoshop.

After all the separation, save all images in .jpg format one by one and store them in a single folder for efficiency.

In this project, we made 6 html files, 3 css files and 1 js file. All 10 files are stored in same folder in which we saved other images.

There are also some other background images used in this website project. They are also saved in the same folder.

By saving all the files and images or other in one same folder gives more efficient and quick output.
